

MONITOR 17-70/71 CRUSH TESTER UPGRADE

BEFORE

AFTER

NEW WARRANTY!!

Now you can upgrade your existing Monitor 17-70/71 Crush Tester to our new series 17-76 Crush Tester with advanced features including Test Method storage for quick operator set up. By upgrading your existing unit you will save thousands of dollars on the cost of a new machine. Additional savings include eliminating high maintenance costs, repair downtime and a tax write-off.

What does the upgrade include?

Replacing all existing electronics including the front panel, digital displays, amplifier and motor are replaced with the New 17-76 Microprocessor design. The new electronic system provides precision speed control and improved testing accuracy based on advanced data acquisition rates. The new system also includes an intuitive control panel and large 5.7 inch color display which provides easy operation of the testing sequence. Advanced software offers test method storage and selection of popular testing standards including: RCT, CMT, CCT, PAT, FCT, Stacking Height and Peak Force. System software also includes 7 languages as a standard feature.

Benefits include:

- Large 5.7 inch color display
- Built in Printer
- Software control of testing parameters
- Test Method Storage offers quicker testing operation
- Test result storage with Statistics, High, Low, Mean and Standard Deviation

By maintaining only the robust mechanical frame which includes the instrument base, guide rods and ball screws from the existing 17-70/71 series, we are able to provide a savings of thousands of dollars off the cost of a new Crush tester. *Note: Upgrade must be performed at our facility and only available on ball screw models.*
